

# Umo hand spa

Rejuvenate and maintain the beauty of your hands!

Our UMO Hand Spa hydrotherapy uses Gamma PGA, which has a hydrating effect that is 10 times stronger than the ever popular, hyaluronic acid, and works to:

- Lock in moisture for soft, supple skin
- Increase the production of your body's Natural Moisturizing Factor (NMF)
- Eliminate fine wrinkles and carry other nutrients as it penetrates
- Maintain and rejuvenate the youth and beauty of your hands

Designed for deep moisturizing, UMO Hand Spa rejuvenates the skin on your hands by helping you achieve a softer, more youthful complexion.

Results will enhance your skin's natural moisturizing capability, keeping your skin smooth and supple, at a reasonable price. After one treatment you'll notice a softer, more youthful complexion.

*My hands truly benefit by my using the UMO Hand Spa. My skin was dry and cracking and lotion alone wasn't doing the job. I have been a regular user of this Planet Beach service for the last several weeks and now my hands are smooth, moisturized and more youthful.*
